

Health and Wellbeing Service East West University

Access to physical health-care services including information and education services.

We have a small “Medical Center” serving emergency & regular health care. Two qualified Doctors (one male & one female), and one female senior staff nurse provide initial medical services in the campus. Medical Center is open for all students and staff all day long during working hours.

From the Medical Center, we provide medical check-ups, make a provisional diagnosis, immediate management plan, prescribe medications, suggest some necessary investigations, if needed, for the proper diagnosis and treatment, and/or refer to higher medical facilities nearby for better and further management as well.
